 LUMEI PEAK

Foroozan Sarboland Accessories International Co.,LTD;
started to work by Chinese investors with more than
4000,000 USD in 14th July 2015.

Although our technology, materials, and equipment are
completely from China, our great custom distance
convinced us to build up the factory in Iran.

Aluminum Composite Panel is the first product of our
company, known by ALUTOK and ALUMEI PEAK.
Being successful in supplying ACP, made us to produce
stainless steel (YEACHO) which is our second product.

Aluminum Composite Panel

Products are manufactured with high-quality material
with the combination of advanced science and
technology and high-precision device; So we guarantee
to produce the best quality goods and satisfy every
individual customer.

Certificates:

ISO 1400-2004 OHSAS18001-2007 ISO 9001-2015
CE-2015

Alutok Composite Panel

- Can be produced in 1.25*3.20, 1.22*2.44 or any
ordered size.
- Can be produced with your own brand label.
- Are guaranteed about 10-15 years depend on
color types.
- Has had 15 colors, but now you can see more than
50 colors depending on the size.
- Produce FR ACP near future.

Stainless Steel

Our company is a professional manufacture of
stainless steel circular pipe, rectangular pipe,
embossed pipe and threaded pipe with 201 and 304
grade.

We adopt international advanced production and
testing equipment, and we own normative
management, professional staffs, abundant capital
and film technology. Our products are produced
strictly according to ISIRI (Institute of Standards and
Industrial Research of Iran). We sell our products
mainly to the countries in Middle-East.

We insist on the theory of "credibility first, customers
precious, we persist in pursuing, explore more
market". Welcome to visit and purchase. Let's
develop our bright future hand in hand.

INTRODUCTION TO THE MATERIAL OF ALUMINUM COMPOSITE PANEL

What is an aluminum composite panel?

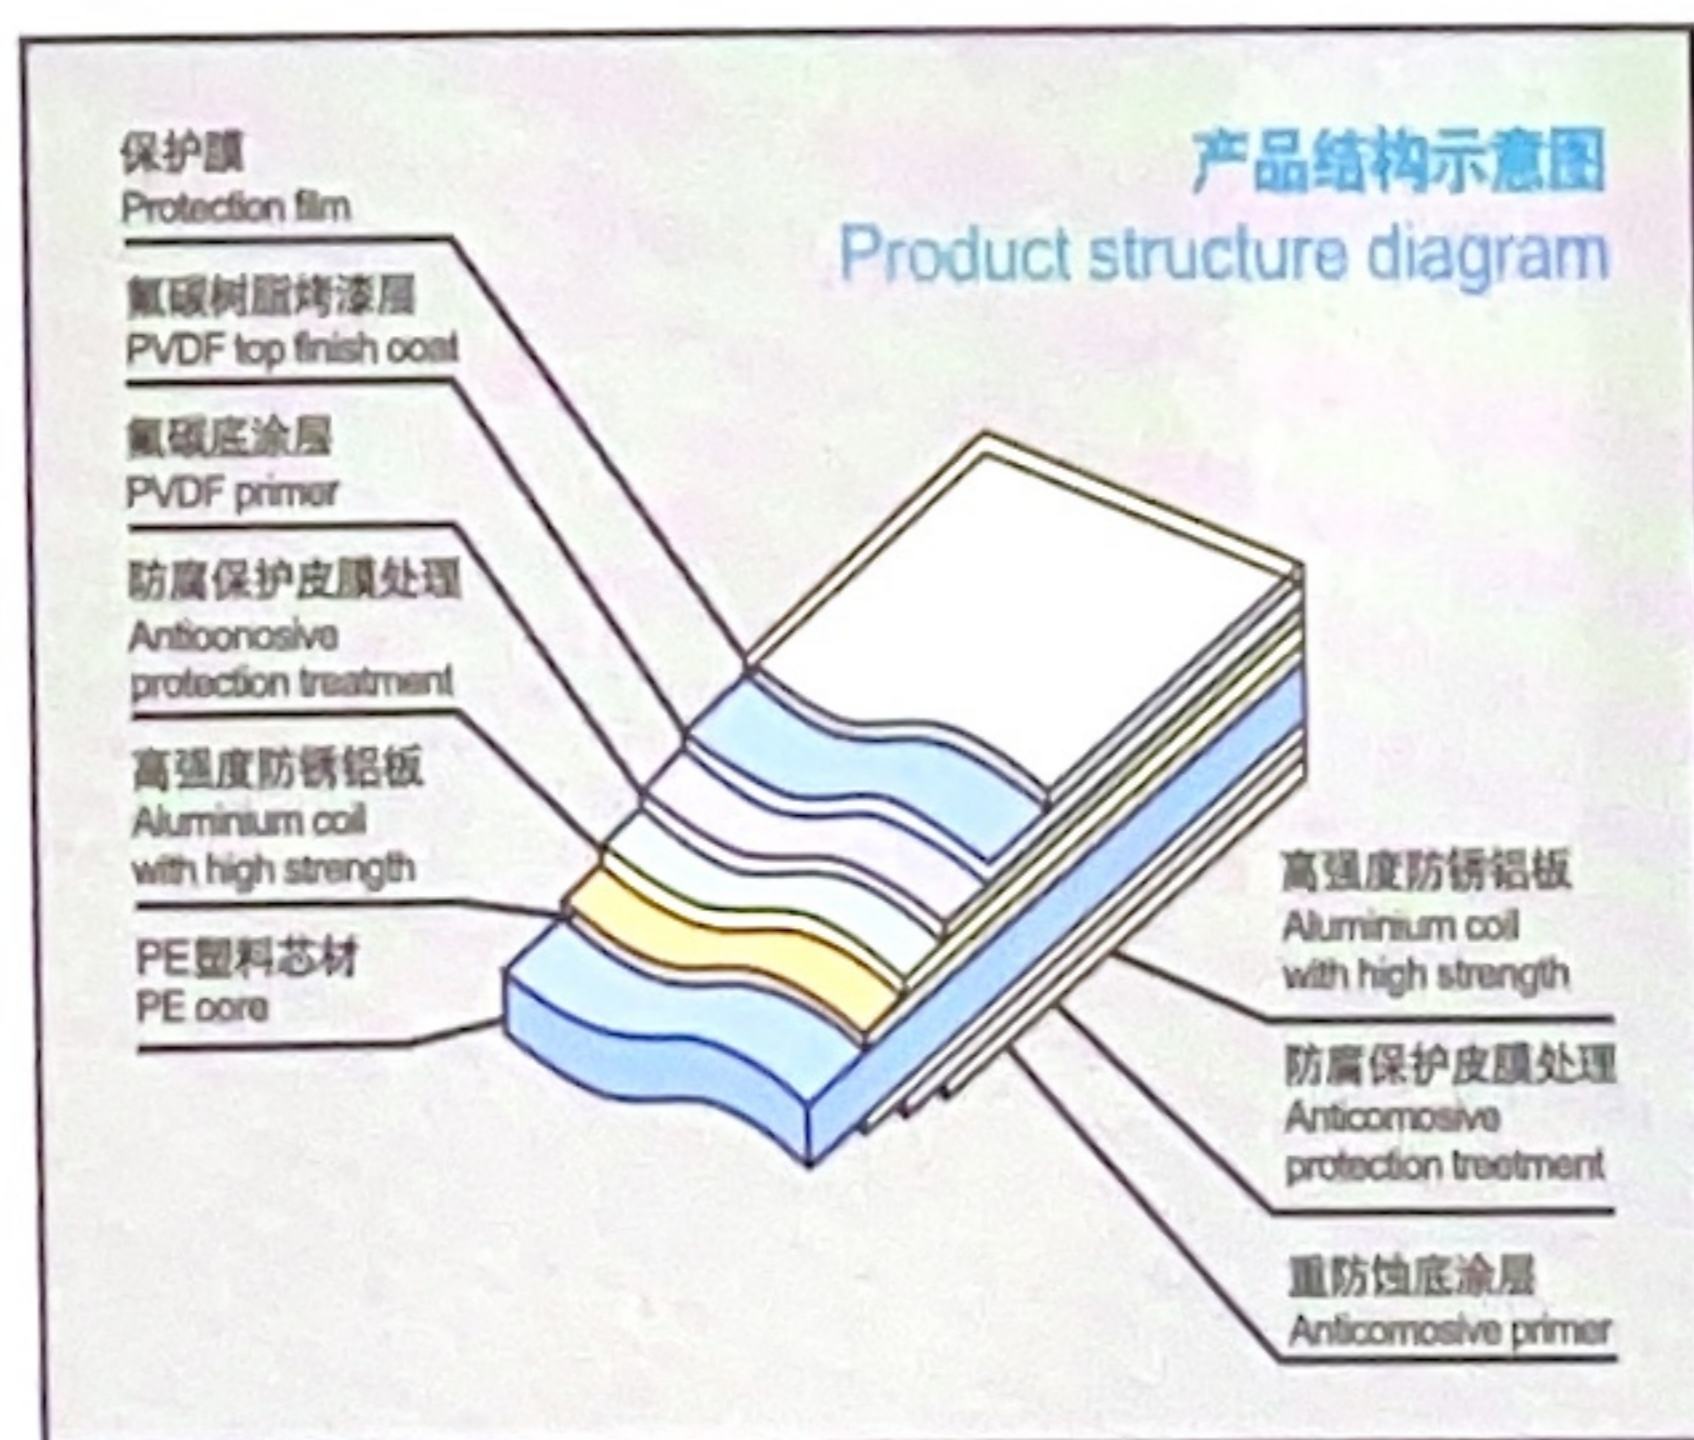

Aluminum composite panel (ACP) is a widely-used term describing flat panels that consist of a non-aluminum core bonded between two aluminum sheets.

ACPs are also commonly known as aluminum composite materials or ACMs.

ACPs are a material commonly comprising two outer aluminum skins and a low density infill such as polyethylene or other material. There are a large number of products available to the market from a variety of suppliers. The panels come in a large of thickness which is typically between 3 to 6mm. the aluminum sheets are normally 0.5mm thick for all panel thicknesses.

Range of applications:

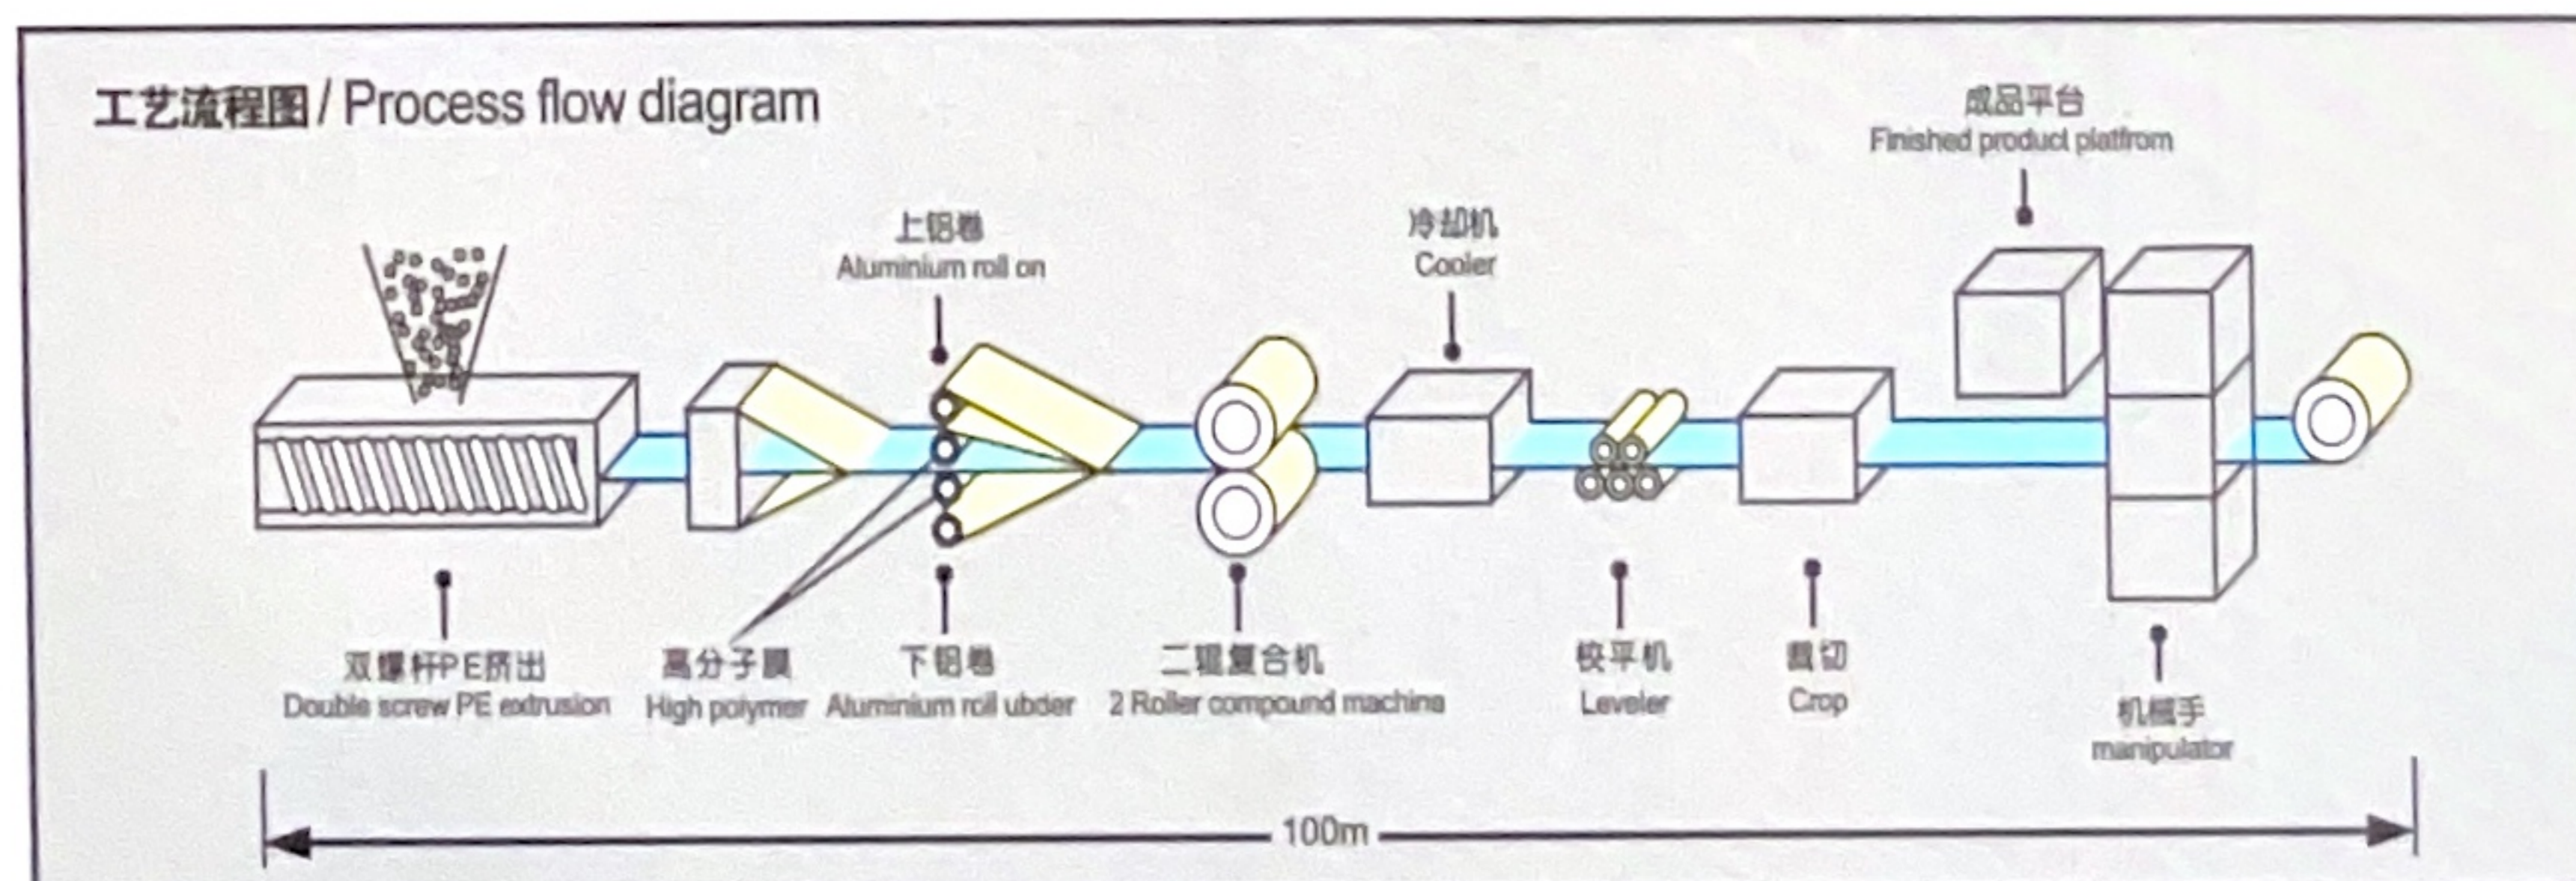

1. Flat panels
2. Sign trays
3. Individual lettering
4. Individual logos
5. Column cladding
6. Counter cladding
7. Ceiling tiles
8. Exterior signage
9. Grilles and screens
10. Interior and exterior design-wall panel, cladding, etc.

铝塑复合板 / Aluminium Composite Panel

铝塑复合板的主要特点表现在以下几个方面:

- 1、刚性好 / High rigidity
- 2、色彩丰富, 装饰性强 / Various color and Democratic
- 3、表面平整度高 / Good leveling
- 4、耐久性好 / Excellent durability
- 5、加工性好 / Easy to install
- 6、优异的防火性能 / Outstanding characteristics of fireproofing
- 7、成本特性好 / Good characteristic of cost
- 8、环境协调性好 / Environment coordinated
- 9、用途广泛 / Wide application
